

**An Early/Mid Floricane from Canada**  
**A real alternative to Tulameen**

**‘*Chemainus*’**

EU PVR no. 20080650

**The Plant (tested as BC89-33-84)**

- Owned by Agriculture and Agri-Food Canada
- Crops 6 days earlier than Tulameen
- Easily trained, excellent bud break
- Exclusive (through Meiosis) for Europe
- A new variety from the breeder of Tulameen with excellent disease resistance

**Fruit Quality**

- Consistent conical shape with regular drupelets and excellent cohesion
- Glossy, attractive colour berries, easy to pick providing cheap picking costs
- Excellent flavour, slightly sweet with pleasant acid balance, good firmness
- Shelf-life 4+ days, high percentage Class 1 fruit
- Large fruits, average berry weight exceeds 5g in Europe
- Frost tolerant
